

**HEATER**

DJR Series aluminium alloy heater is a new type of dehumidifier and moisture-proof heater designed for electrical equipment, like switchboard, switchgear, relay cabinet and so on.

This heater use special aluminium alloy plate and high quality Ni-Cr alloy heating wire, it is characterized by small size beautiful appearance, even heat, fast heat conduction, large thermal area (2~3 times than the same size normal heater), thus ensuring the service life of electric wire heater much longer than normal tube-type heater, make it quality for long-term stable and reliable work.

Besides, this heater also has high strength insulation and easy mount features, if work with our automatic heating control dehumidifier can be implemented using for electrical equipments moisture-proof, anti-Gel, heating control automation.

**PARAMETER**

- electrical strength (terminal and surface): 2kV
- life: > 5000hours
- insulation: 1000MΩ
- operating voltages: AC380V, AC220V, DC220V, DC110V

Model	Heater Power (W)	Dimensions (mm)			Weight (kg)
		L	W	H	
DJR-500	500	200	140	35	1.5
DJR-400	400	200	140	35	1.2
DJR-300	300	200	140	35	0.7
DJR-200	200	176	104	20	0.63
DJR-150	150	176	104	20	0.55
DJR-100	100	132	104	25	0.48
DJR-75	75	88	104	20	0.39
DJR-50	50	88	85	20	0.32
